

Animals

Part 1:

1. Do you like animals?

Answer: Personally, I only like the company of friendly species such as dogs, cats, and birds. I feel they are man's companions, and keeping them as pets will assist me in discharging emotional distress.

2. What's your favorite animal? Why?

Answer: Dogs, undoubtedly. Currently, I am overseeing two pets. When I return from work, they are always there to receive me at the entrance. Additionally, they help me feel better when I'm feeling low. Therefore, I adore dogs.

3. Are people in your country fond of animals?

Answer: In fact, no. Unfortunately, this is the reality. Instead of respecting animals, the majority like abusing them and capturing images to share with others or post on Facebook.

4. What kinds of animals as pets do people have in your country?

Answer: Like other nations, we often keep dogs and cats as pets. This is because these animals are domesticated and simple to coexist with.

5. Do you think cities are suitable places for keeping a pet?

Answer: No, I don't think so. This is because dogs' health may be negatively impacted by the heavy traffic and development in urban areas as pets are more likely to get hurt in traffic or to have trouble finding adequate play places.

6. Do children in your country like animals?

Answer: Yes. Kids love having dogs and cats as pets because they are friendly and their hair is soft and comforting to touch. These creatures are safe for them to cuddle and play with.

7. What kind of animals do you think children like?

Answer: For me, it all simply comes down to their individual traits. Most kids like cat and dog companionship because they are so playful and free-spirited. On the other hand, there are kids who just can't get enough of the birds' chirpy songs. Furthermore, there will always be those who find pleasure in torturing or humiliating animals.

Part 2:

Describe an aquatic animal

Since my childhood, I have been interested in learning about aquatic animals. I was always amazed by seeing it. Now, I am going to talk about an aquatic animal which I found interesting.

When did you see it? and Where did you see it?

The animal that I am going to talk about is the dolphin. I saw the dolphin in a cartoon for the first time, when I was in 5th grade. It was portrayed as a friendly and joyful creature. I wanted to ride with dolphins by sitting on its back.

What does it look like?

Dolphins are big in size and have smooth and rubbery skin. It is a mixture of colour including white, grey and black. They use their two fins to move forward. When I read about dolphins on the internet, I found it is one of the most intelligent living creatures on the planet.

Explain why it is interesting?

It is exciting to watch dolphins come out of the water and wag their tails. It is also friendly and sociable. They are even able to develop a language to communicate with others. In the entertainment industry, you can see it often, that itself assures that it is an interesting creature.

Conclusion:

Even talking about dolphins excites me. It is fun and interesting to watch. It is really an amazing aquatic animal.

Part 3:

1. In what ways are humans different from other animals?

Answer: The main difference between humans and animals is that human beings have a higher thinking capacity than animals. We have the ability to do complex tasks using our brain, speak multiple languages and solve problems. The brains of animals have not developed as much as humans.

2. What are the main roles of animals in your country?

Answer: Animals are used to carry goods for long distances, to guard houses, as pets, and are also consumed as food. Big animals like elephants and buffaloes are used for carrying heavy weights. Dogs and cats are bought as pets. In some parts of the country, animals are also worshipped, and in some places, it is sacrificed.

3. Why is it important to conserve the world's animal and plant species?

Answer: Wildlife and forests are important for our sustainable living because without them we will not be able to live on Earth. The balance of nature will be lost if the trees and animals disappear. The world not only belongs to us, but to them too so it is important that we provide them the space to live too.

4. Which species are endangered in your country? Why?

Answer: The Asiatic Lion, Bengal Tiger, Snow Leopard, and One-horned Rhinoceros are some of the animals that are endangered in my country. These animals are endangered because people illegally hunt them for greedy reasons. Several organs of these animals are used to make expensive things and sold on the black market.
